

PRESS RELEASE NOVEMBER 2024

A successful journey for Europe's new social entrepreneurs

After months of intense work and collaboration, the INNO4CHANGE project is pleased to share the latest achievements in a journey that is already leaving a tangible mark in the field of educational innovation.

Each meeting represented an opportunity to consolidate synergies, evaluate achievements and define strategies for the future. These face-to-face moments strengthened team spirit and nurtured a common vision for a more modern and inclusive education.

Video interviews: Stories of Change and Impact

One of the distinctive elements of INNO4CHANGE is the series of video interviews conducted with experts and educators in the field. These testimonials, available on our YouTube channel, tell the story of the changes taking place and offer insight into the direct experiences of the protagonists. The video interviews are a valuable dissemination tool, bringing stories and reflections directly to a wide and diverse audience.

Launch of the INNO4CHANGE YouTube Channel

To increase the accessibility and dissemination of the content, a YouTube channel dedicated to the project was created. The channel collects video interviews, presentations and other materials, consolidating an open and interactive platform for all those interested in following the progress of INNO4CHANGE and exploring new perspectives in the field of education.

Educational Platform: Access to Study Materials

A central pillar of INNO4CHANGE is the sharing of high-quality educational resources. Recently, study materials created to support teachers and students have been published on our online platform. These resources, designed to be user-friendly and flexible, are already available to the public, marking an important step towards democratising access to innovative educational content.

You can find the website here:

We would like to express our gratitude to all stakeholders who, with their commitment and trust, contributed to the improvement of the project. Their active participation and support during the testing phases of the platform have been and will remain crucial to the success and growth of the new social entrepreneurs.

INNO4CHANGE continues with enthusiasm towards the final stages, aware of the value of relationships and the transformative potential of education in step with the times. We invite everyone to stay updated and follow our activities on official channels.
