Empowering Change through Mycology: The Fungipreneurs Toolkit.

In our ongoing commitment to fostering social inclusion and environmental awareness through mycology, we are proud to highlight the progress of the Fungipreneurs Toolkit—a core component of the Fungipreneurs project funded by Erasmus+. Collaboratively developed by a consortium of European partners, this toolkit represents our collective mission to integrate vulnerable groups in rural areas into active and impactful community roles. The activity has been led by ECM.

These resources equip them with functional, interactive techniques and activities that not only engage learners but also drive forward the principles of sustainability and social entrepreneurship.

Empowering Change: FUNGIPRENEURS The toolkit, rooted in the theoretical framework of applied mycology, provides a structured approach to education in rural settings.

It incorporates a variety of learning units, such as road mapping methodologies, social entrepreneurship, digital literacy, and the marketable value of mycological resources. Each unit is crafted to facilitate easy application and adaptation, ensuring educators can tailor the learning experience to their specific audience needs.

FUNGIPRENEURS Training Path

A digital tool (*Training Path*) was developed based on gamification and roadmapping approaches to engage vulnerable groups in rural areas, promoting social inclusion through environmental awareness and social entrepreneurship in their daily practices.

FUNGIPRENEURS Training Path: Two methodologies for maximum engagement.

GAMIFICATION: learning method improving training results, as learners are more engaged, motivated and inclined to remember the knowledge they are being taught. Their competences are enhanced and developed, providing a secure space for them to develop their self-reliance and active citizenship.

ROADMAPPING: dynamic method to develop and apply a training itinerary, allowing to track and review it as required. It engages and aligns parties in a collective course of action. Therefore, by bringing interested stakeholders together to collaborate in common goals and objectives, the mechanism will foster significant, long-lasting partnerships.

Partner meeting in Klagenfurt

FUNGIPRENEURS consortium in Klagenfurt for the 4th transnational project meeting.

On the 9th of April, the project managers from FUNGIPRENEURS (Portugal, Austria, Cyprus, Ireland and Spain) met in Klagenfurt, Austria for a meeting hosted by META4. During this meeting, the partners discussed the prototype version of the training path and the toolkit.

Partners also discussed the progress of the E-learning platform and the project website and agreed upon the next steps for the implementation of pilot sessions with the relevant stakeholders from adult education.

A brainstorming for finalising the Sustainability Strategy was conducted. All partners exchanged ideas and suggestions for intensifying the project dissemination.
