

PRESS RELEASE

20 June 2024

CSI Cyprus hosted the project's 4th Transnational Partners Meeting

On June 3rd and 4th, 2024, partners of the TALENT project (Project No. 101090147) met in Nicosia, Cyprus, for a two-day meeting hosted by CSI at Yfantourgeio the Workplace. The meeting served as a key milestone for reviewing progress and coordinating upcoming activities across various work packages.

The first day focused on finalising the E-STOP platform's user guidelines and preparations for its upcoming launch. Partners agreed on translation deadlines, test input, and good practice entries, with platform deployment expected by the end of June. Plans were made for outreach to national sports federations and service providers.

Significant progress was made for the development of educational modules and pilot training. Each partner will finalise their module content which had to be pilot tested with 12 teachers and 12 coaches.

On the second day, the consortium discussed the final project meeting, set for April 9–13, 2025, in Sarajevo, combining working sessions, a public conference, and a celebratory event. Dissemination and communication efforts were also reviewed, including upcoming videos, reels, and athlete testimonials designed to promote the project's message.

The TALENT project continues to empower educators, coaches, and young athletes by strengthening dual career support across Europe.
